

Pavers

"The paving design of a project has a strong influence on the project's character, its coherence, and, ultimately, on its meaning. A pavement can facilitate connections between the parts of a built environment, and to the person using that space."

- Barbara Lien

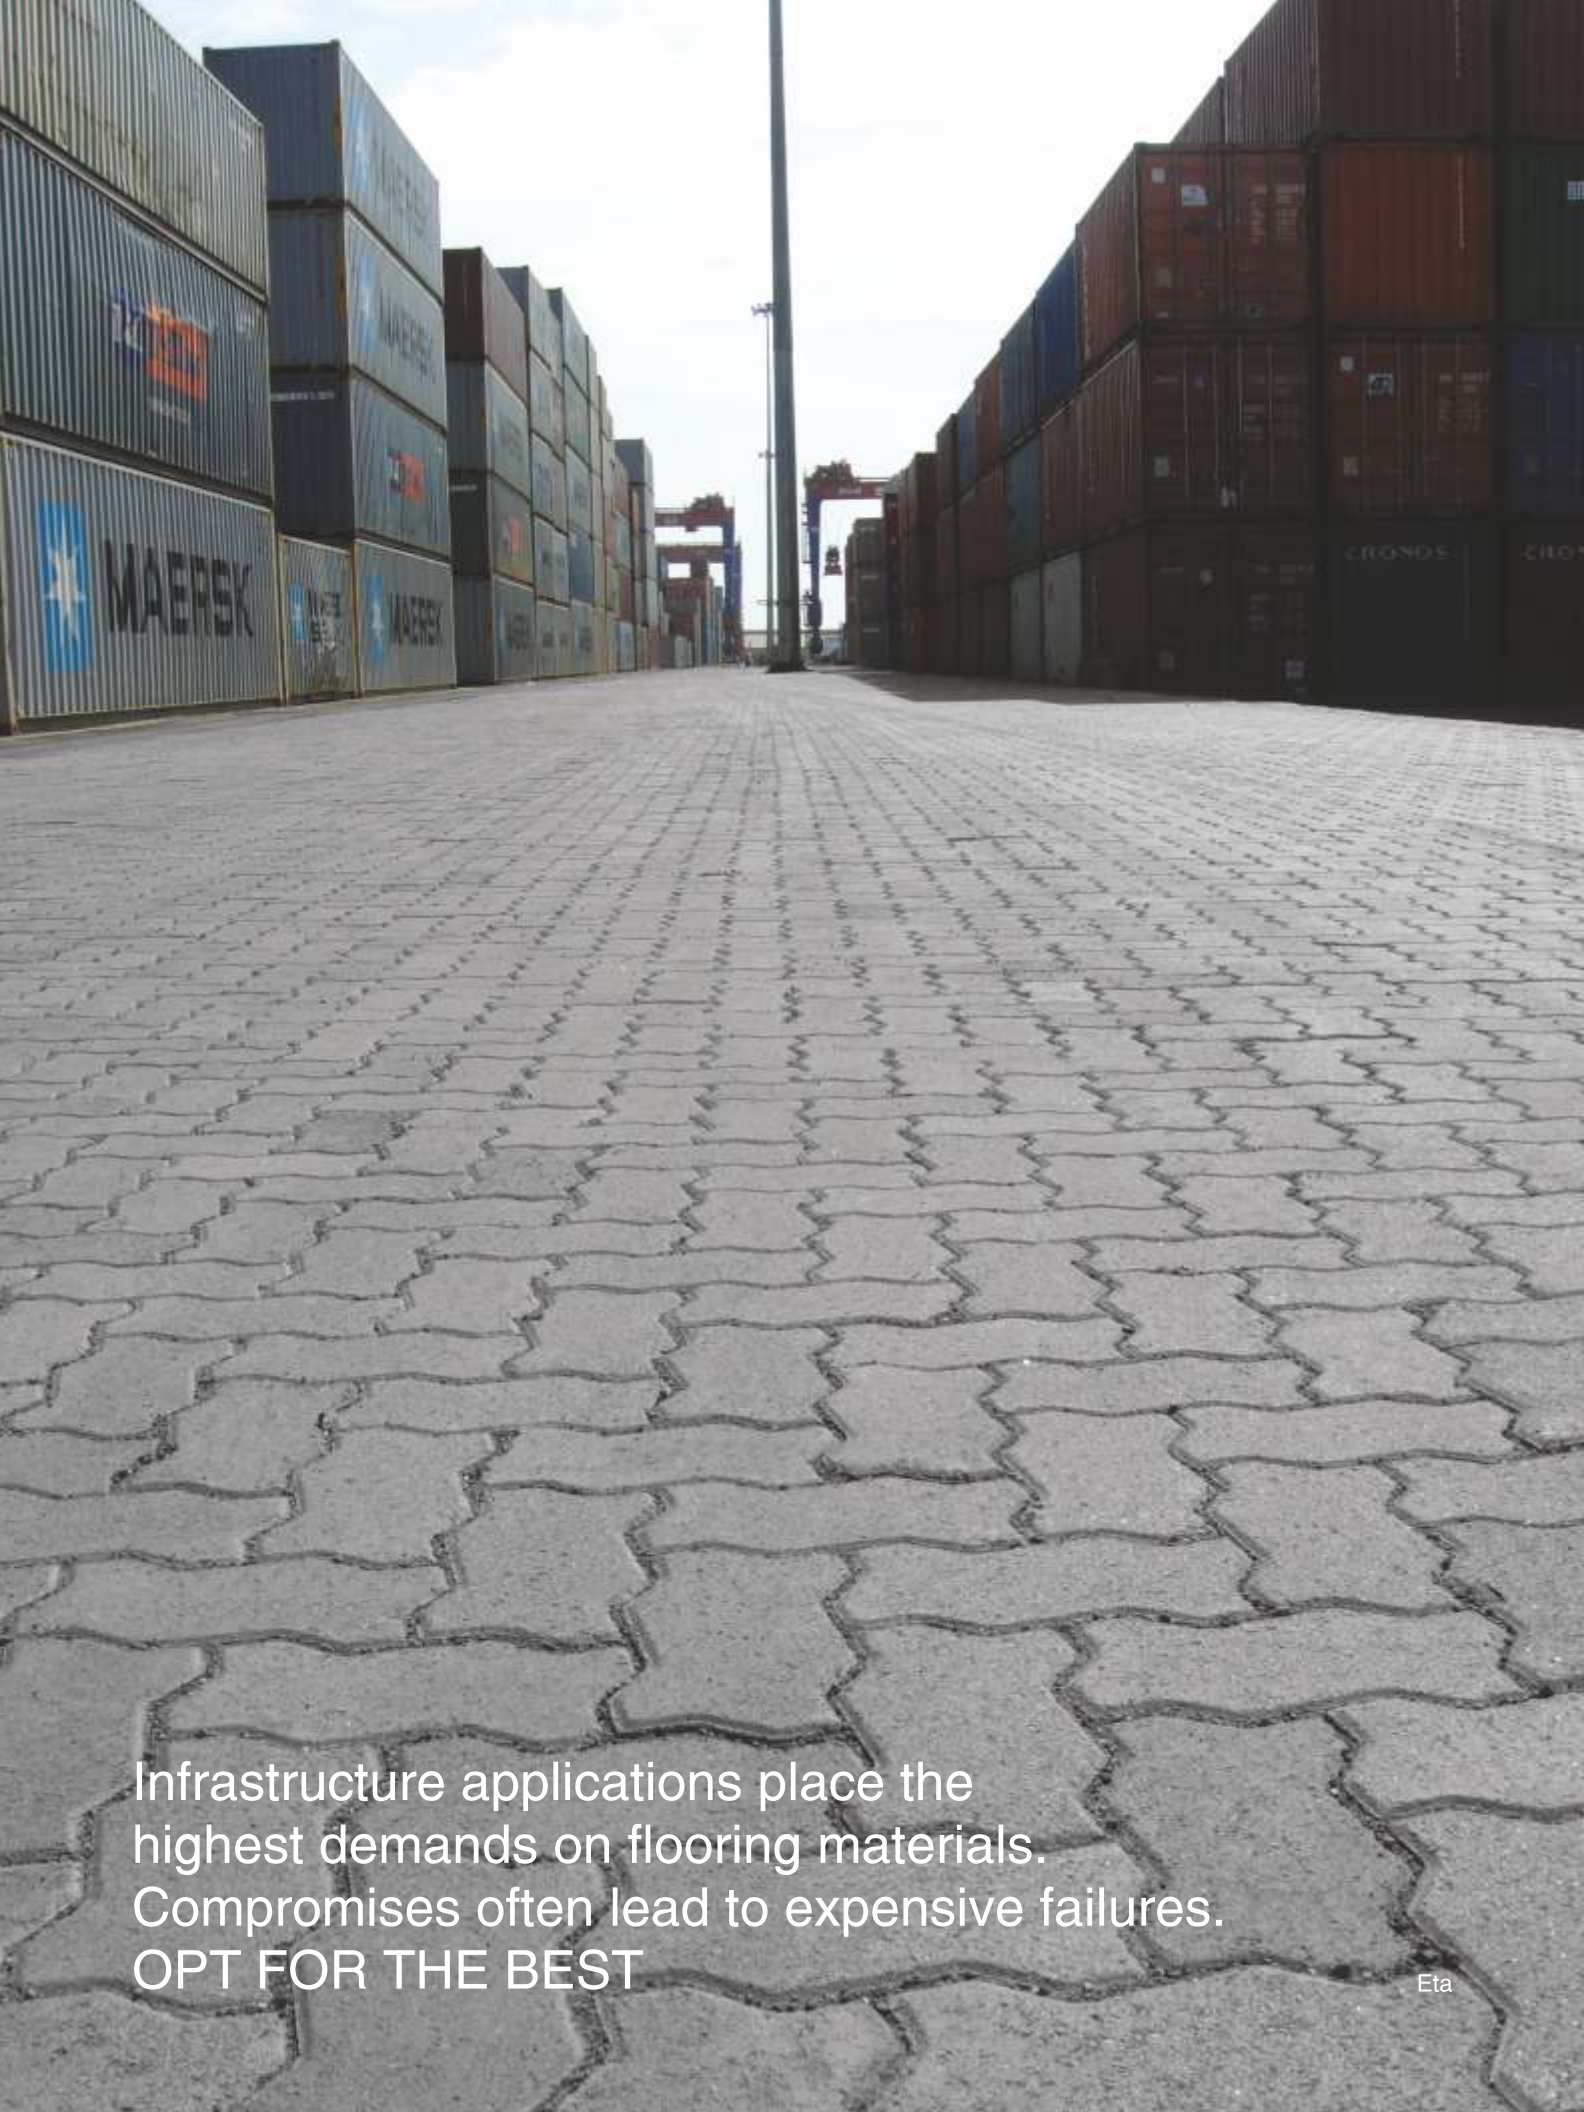

At VYARA, we are dedicated to achieving business goals ethically, fostering mutual respect, and creating lasting value. Our products are crafted with technical expertise and precision to elevate the user's experience and enhance every space they touch.

With a steadfast commitment to sustainability, we lead the industry with eco-friendly innovations, including our **GreenPro certified products** and low-carbon solutions like the UNCARBON range. Our cutting-edge offerings—Vacuum Wet Pressed Kerbs for intricate details, the Melange series, EcoPave, Flagstones and Cobbles—stand among the finest in the world, delivering unmatched quality and environmental responsibility.

About Us	Discover VYARA's Legacy	61

VYARA offers a palette of over 50 meticulously curated colour shades from our exclusive colour 'master.' Custom shades can also be tailored to meet specific design preferences upon request.

HSF

VYARA's High Strength High Finish (HSF) concrete pavers embody a legacy of reliability, delivering exceptional quality and performance for large-scale, high-stakes projects.

HSF enables you to meet demanding timelines with uncompromised aesthetics and durability, all while boasting one of the lowest carbon footprints in the industry.

Customizable colours and finishes, including Shotblasting and **PremierShield** protection are available to further enhance pavements and spaces.

Infrastructure applications place the highest demands on flooring materials. Compromises often lead to expensive failures. **OPT FOR THE BEST**

VYARA's **Brick** Pavers, in the classic 200x100 mm rectangular shape, offers timeless elegance and clean, versatile lines. They allow precise architectural detailing, adding sophistication to any space.

VYARA's **BrickLine** in a slim 240x60 mm size, combine versatility and refined aesthetics with dynamic pattern options like herringbone and radial layouts.

They are ideal for driveways, walkways, courtyards, and urban landscapes, providing durable and stylish solutions.

The **Square** paving stone is a timeless and versatile choice, favoured by designers for its aesthetic appeal and adaptability. Offered in various sizes and thicknesses, it has been featured in landmark projects like the iconic **Statue of Unity** and Ahmedabad's **C.G. Road**, among many others.

Our **Equilatero** paving stone, originally custom-designed for **Carter Road Promenade, Bandra** offers endless design possibilities. Suitable for pedestrian use and light vehicular traffic, it blends elegance with practicality. Whether your vision leans toward classic charm or contemporary flair, our Square and Equilatero paving stones deliver exceptional results every time.

Quadrastein Stone

HSF

VYARA's **Quadrastein** paving stone, the first of its kind in India, redefines square paving with innovative wide spacer locks for superior interlocking. Its timeless stone effect, combined with a compact 60 mm size, delivers exceptional durability, often replacing traditional 80 mm pavers without compromising strength.

Designed for heavy-duty applications, landscapes, pedestrian areas, and urban projects, Quadrastein seamlessly blends classic aesthetics with cost-effective performance.

ECOPAVE

EcoPave offers a continuously growing range of decorative grass paving options.

Features of VYARA's EcoPave range are as follows:

- Grass-filled cavities reduce heat islands and create greener spaces.
- Uses recycled materials to lower carbon footprint.
- Reduces and cleans water runoff, aiding aquifer recharge.
- Durable for light traffic and fire brigade loads.
- Supports IGBC and LEED certifications.

COBBLE SQUARE

VYARA's Cobble Square offers a timeless and durable alternative to natural stone cobbles. These 100x100 mm square cobbles feature a clean, modern look and are user-friendly for wheelchairs, the elderly, children and stiletto wearers.

They can be laid in straight lines, staggered joints, or radial patterns beyond a 1-meter radius, adding versatility and visual appeal to residential and commercial hardscapes.

Available in Mélange, Shotblasted, and Rustic finishes, VYARA Cobbles combine aesthetics with practicality. Our team is ready to assist with patterns and special designs, ensuring a perfect fit for your project.

Rustic

COBBLE SQUARE STONE

VYARA's Cobble Square Stone features 100x100 mm concrete cobbles with a random stone surface texture, offering a natural, non-repetitive appearance that closely resembles real stone. The varied surface textures add an authentic charm, making them virtually indistinguishable from the natural cobbles.

Customisable in a wide range of colours and finishes, these stone textured cobbles combines durability with a timeless, natural aesthetic.

Cobble Square Stone
80/60 mm

COBBLE FAN

VYARA pioneered the first wedge-shaped fan cobble stones in India with its innovative Cobble Fan design, which create visually striking fan, circular, and radial patterns, adding strong graphic appeal and artistic value to landscapes.

Perfect for creating distinctive hardscapes, Cobble Fan combines functionality with aesthetic charm.

Proper planning is essential, as laying patterns and custom key stones vary with each project. Share your drawings with us, and our team will assist in optimizing your design and ensuring flawless installation.

MAXIPAVERTM

VYARA's MaxiPave is a durable, eco-friendly paving solution for pedestrian walkways, cycling tracks, and urban areas. Featuring modular flags in three sizes, including the largest at 750x375 mm, MaxiPave allows **quick, adhesive-free installation on sand or aggregate beds**.

Its rounded and conical spacers enhance interlocking, reduce maintenance, and improve drainage, making it ideal for areas with mobility aids. Perfect for urban precincts, public gardens, and recreational spaces, MaxiPave provides clean, hardwearing surfaces with excellent water drainage.

ESCALON™

Escalon is India's first plank paving with a unique concept of varied-size paving planks. Comprising 16 stones in 9 sizes, the largest being 600x150 mm and 560x120 mm, all 100 mm thick.

The carefully chosen thickness, the specially designed combination interlocking spacer bars, the lack of chamfer in the stones, are some of the special features that make the Escalon unique. It is a true pragmatic, quick and inexpensive, yet top end plank format paving. It is ideal for light vehicular traffic and occasional heavy loads.

DECASTONE™

VYARA's Decastone offers rugged, stone-like durability with an 80 mm thickness. Featuring ten modules, the largest at 225x220 mm, they enable versatile paving patterns.

With unique spacers for superior interlocking, Decastone is ideal for internal roads, driveways, and gated communities. Its undulating surface mimics aged cobbles without the maintenance challenges, and finishes include Plain, Shotblasted and Mélange.

BEGANITTM NEO

VYARA's Beganit Neo pavers build on the legacy of India's first wedge-shaped, chamfer-free cobble setts, introduced in 2006. With enhanced features like a cleaner, more usable surface and reduced edge damage, Beganit Neo offers a refined, rock-like texture that balances aesthetics with practicality.

Ideal for internal roads, residential landscapes, and hardscaped spaces, these 60 mm thick pavers provide a tough yet timeless stone finish, delivering durability and sophistication for any outdoor setting.

PAVER FINISHES

Shotblasted

Shotblasting is a VYARA forte. VYARA maintains an edge over the competition in quality, supply, and range of Shotblasted paving. Shotblasting is ideal for texturing and efflorescence removal from concrete products.

PremierShield

PremierShield is a premium, integral, and topcoat treatment system for paving materials. It enhances water and oil repellence, prevents efflorescence, algae, and moss, and offers UV-stable, long-lasting protection with vibrant color enhancement which increases the value of the paving.

Rustic

VYARA's Rustic Tumbled Pavers, first in India, deliver an antique, weathered look through controlled distressing. Ideal for driveways, garden paths, and patios, they combine timeless charm, slip resistance, and durability. Optional shotblasting or PremierShield coating further enhances their beauty and performance.

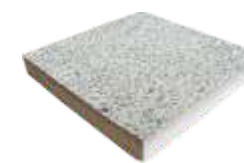

FLAGSTONES

VYARA's Flagstones are large-format concrete pavers, ideal for urban spaces, pedestrian areas, and light vehicular traffic. Available in sizes up to 600x300 mm and thicknesses of 60 mm or 80 mm, they offer durability and slip resistance.

Available in various finish options hence combining the look of natural stone with enhanced performance.

Modular combinations with smaller pavers add design versatility.

300*300*80/60 mm

400*400*80/60 mm

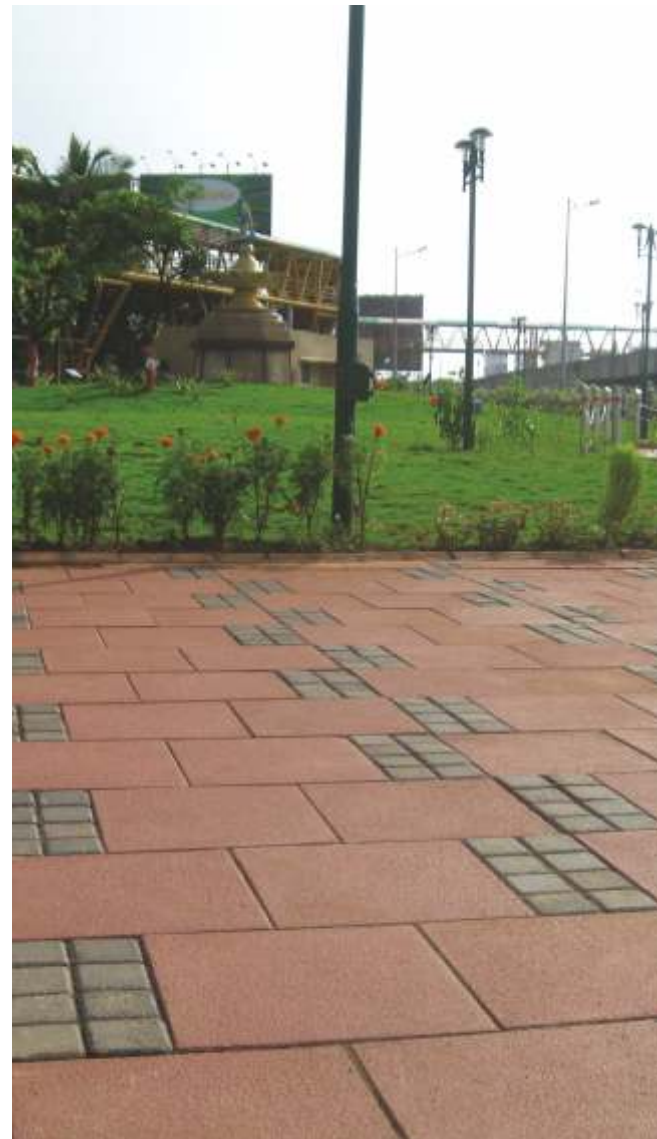

300*450*80/60 mm

300*600*120/100/80/60 mm

FLAGSTONES

Our seamlessly modular Flagstones can be paired with smaller paving units, unlocking a variety of innovative design possibilities. These combinations enable striking layouts that balance functionality and aesthetics, with several pre-designed options available for immediate use to enhance your project.

Applications

Concrete flag paving provides an attractive surface suitable for:

- Pedestrian footways and precincts
- Forecourts and entrances to public buildings
- Approaches and surrounds to residential and industrial buildings
- Areas surrounding shops and offices
- School playgrounds
- Public and private gardens
- Swimming pool surrounds
- Footways where vehicular overrun is unavoidable
- Home zones and urban regeneration
- And other areas where a durable external surface is required

KERBSTONES

Pre-cast concrete kerbs are often referred to as the unsung heroes of roads and streets. They serve multiple functions, including:

- Enhancing aesthetics and contributing to the paved environment.
- Strengthening carriageway edges for durability.
- Deterring vehicles from mounting footways, ensuring pedestrian safety.
- Preventing vegetation from encroaching onto roads.

Kerbstones are versatile, suitable for urban roads, footways, medians, playgrounds, pedestrian precincts, and industrial pavements.

VYARA's extensive range of products and accessories enables designers to deliver outstanding and detailed solutions for their clients

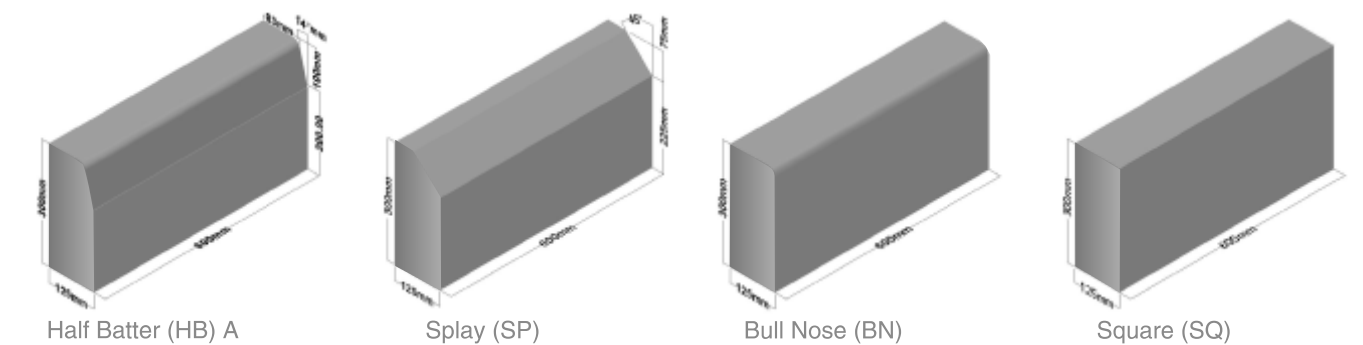

VACUUM WET PRESS KERBS

VYARA pioneered the introduction of a comprehensive range of kerbs in India, manufactured using the vacuum wet press process. This method combines high hydraulic pressure and simultaneous vacuuming, resulting in kerbs with exceptional finish and durability, ideal for road applications. If specified, these kerbs can meet the stringent technical standards of EN 1340: 2003 and IS 5758: 2020.

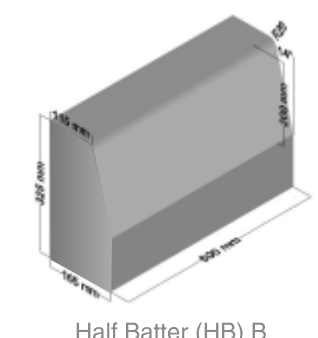

Characteristics of Wetpress Kerbs	Benefits
Very high strength	Long life and value retention of the project. Vehicles can climb over
Large sizes	Fewer joints and better looks
Extremely good finish	Better aesthetics
High abrasion resistance	Lower need for repair and replacement
Low water absorption	Much reduced erosion and maintenance of kerbs
Extremely wide range of products	Allows for most of the details to be catered to

There are four basic profiles commonly used for road kerbs:

- **Half Batter (HB)**- Most frequently used shape, for deflection of traffic and safety of pedestrians
- **Splay (SP)**- Allows vehicles to climb over the footway.
- **Bull Nose (BN)**- Provides smooth access for vehicles crossing from road to entry points.
- **Square (SQ)**- Provides smooth access for vehicles crossing from road to entry points.

Profile	Length (mm)	Height (mm)	Thickness (mm)
Half Batter (HB) A	1000	300	100
Half Batter (HB) A	600	450/375/300/215/175	150/125/100
Half Batter (HB) A	300	600	150/125/100
Half Batter (HB) B	500	325	165/150
Splay (SP)	600	450/375/300	150/125
Bull Nose (BN)	600	450/375/300/215/175	150/125/100
Bull Nose (BN)	600	300	65/80
Square (SQ)	600	450/375/300	150/125/100

*Please refer to our Kerbstones brochure for the full range

ACCESSORY KERBS

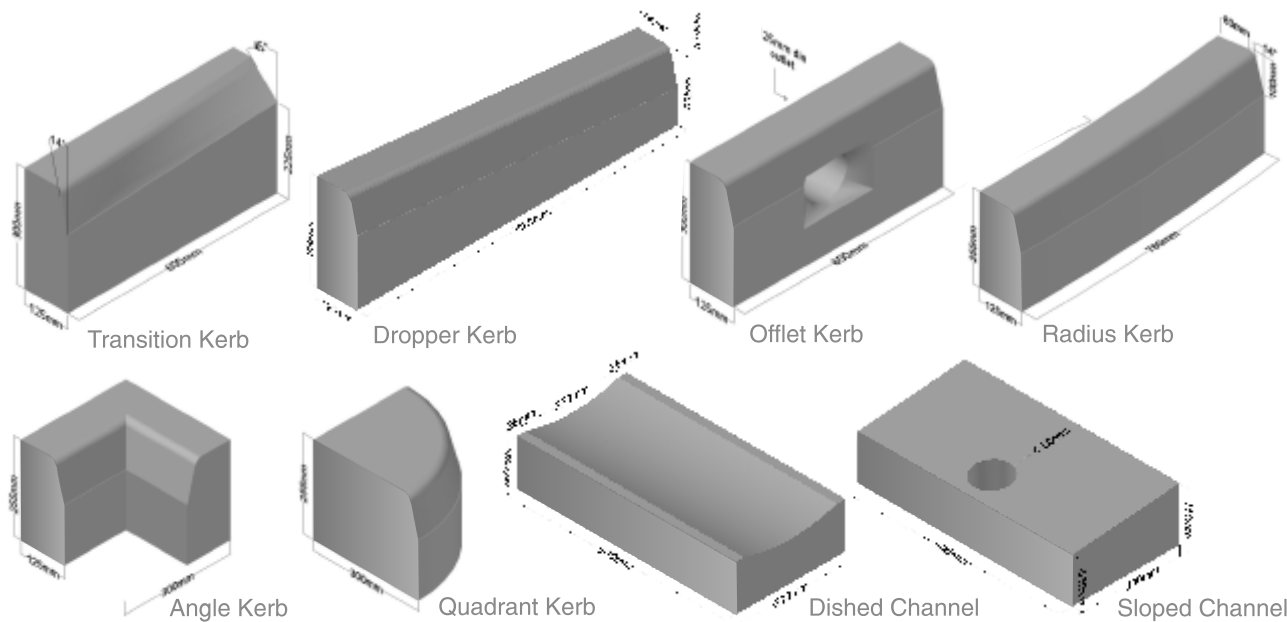

Accessory Kerbs facilitate transitions between kerb types, footway drops, and accommodate radiuses and turnings in roads, ensuring detailed design solutions.

- Transition Kerbs
- Dropper Kerbs
- Radius Kerbs
- Quadrant Kerbs
- Angle Kerbs
- Offlet Kerbs
- Dished Channel
- Sloped Channel
- Gully Kerbs
- L Profiled Kerbs (HB and BN)

These when used together, offer a fairly complete solution to the kerbing needs, whether in the neighborhood, streets or in highways.

*Please refer to our Kerbstones brochure for the full range.

ETCETERA

Etcetera by VYARA is a growing range of precast solutions designed for unique applications. Available in plain or reinforced options, these products come in matching colours and textures to suit varied needs.

DESIGN ENHANCEMENT

Beyond delivering high-quality products tailored to specific applications, VYARA pioneers initiatives that elevate both the functional and aesthetic performance of hardscaped areas.

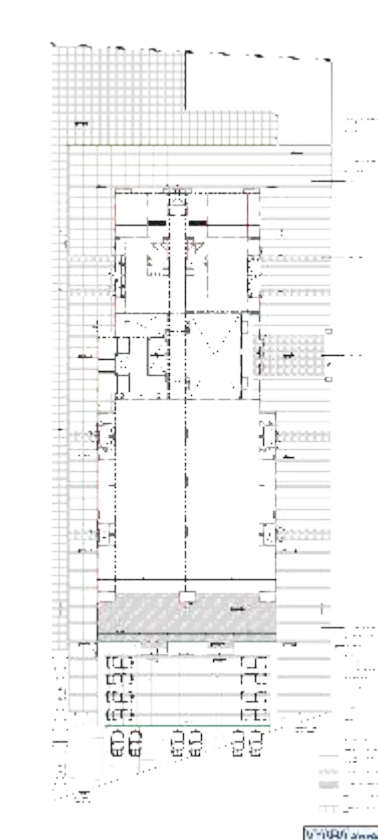

Design and construction of base

VYARA helps with expert guidance in base design and construction to align with your paving requirements.

Overall selection of materials, paving designs and layouts

VYARA helps accentuate, scale, and integrate pavements with a project's design legacy, ensuring users feel accommodated.

Edge and border detailing

Simple borders, proper detailing of typical features appearing on site like manholes, road turning etc. and making the correct type of 'cut-ins' greatly enhance the value of the site.

Some simple square and rectangular shapes of stones can be used for effective border details, which largely enhance the pavement.
